

Employee Attrition Analysis Dashboard

HR Analytics | Power BI Project
By Zahraa Al-Touq

Key Insights:

- Employees with lower satisfaction levels are more likely to leave the company.
- The Sales and Technical departments experience the highest employee attrition, followed by the Support department, indicating that these areas face higher retention challenges.
- Lower salary levels are associated with higher attrition rates.
- Employees with around 3 years of tenure show the highest attrition, indicating that the third year is a critical point for employee retention.
